10-DAY TANCET

Crack Plan

MBA & MCA Preparation Plan

From Zero to Exam-Ready in 10 Days

Works for both **Beginners** and **Revisers**

campusvazhi.com

CAMPUS VAZHI

How to Use This Guide

This Crack Plan is designed to work for two types of students:

Beginners: If you're starting your TANCET preparation from scratch, follow every day in order. Focus on understanding concepts before solving problems.

Revisers: If you've already studied the basics, use each day's 'Reviser Tip' to focus on high-impact areas and skip topics you're already strong in.

Each day includes specific topics, key formulas, practice targets, and separate tips for both levels. Stick to the plan — consistency beats intensity.

TANCET Exam Pattern — MBA vs MCA

Both papers have 100 questions to be answered in 100 minutes. Negative marking of −1/3 applies for wrong answers.

Section	MBA	MCA
Quantitative Aptitude	30 Qs	30 Qs
Verbal Ability / English	20 Qs	20 Qs
Logical / Analytical Reasoning	25 Qs	25 Qs
Data Sufficiency	25 Qs	—
Computer Awareness	—	25 Qs
Total	100 Qs / 100 min	100 Qs / 100 min
Marking	+1 correct, −1/3 wrong	+1 correct, −1/3 wrong

Key Difference

MBA has Data Sufficiency (25 Qs) while MCA has Computer Awareness (25 Qs). The remaining 75 questions are common in structure.

Smart Scoring Strategy

TANCET has negative marking (−1/3 per wrong answer). Use this strategy to maximise your net score:

Strategy	When to Use	Mark Impact
Attempt confidently	You're 80%+ sure	+1 mark
Educated guess	Can eliminate 2 options	+0.67 expected

Skip entirely	Pure guess / no clue	0 (saved −1/3)
Attempt strong sections first	Always	Maximises +ve marks
Time-box tough Qs	> 90 sec spent	Saves time for easy Qs

CAMPUS VAZHI

The 10-Day Plan

DAY 1 — Know the Battlefield

Exam pattern, syllabus mapping & self-assessment

Topics	• TANCET exam pattern — MBA vs MCA sections, marking scheme, time limit • Syllabus mapping: identify which topics carry the most weightage • Self-assessment: attempt one previous year paper (untimed) to find strong/weak areas • Create a personal priority list — rank topics by weakness level
Practice Target	Attempt 1 full PYQ paper (any year) — don't worry about score, just identify gaps
Beginner Tip	Read through the full syllabus first. Don't panic at the volume — TANCET tests basics, not advanced concepts.
Reviser Tip	Jump straight to the PYQ paper. Use it to pinpoint the 3–4 topics where you're losing marks.

DAY 2 — Quantitative Aptitude — Part 1

Number Systems, Percentages, Ratio & Proportion, Averages

Topics	• Number properties: divisibility rules, HCF/LCM shortcuts, remainders • Percentages: fraction–percentage equivalents, successive % change • Ratio & Proportion: componendo–dividendo, mixture & alligation • Averages: weighted average, change in average when item added/removed
Key Formulas / Shortcuts	• HCF × LCM = Product of two numbers • Successive discount: a% + b% = (a + b – ab/100)% • Alligation: Ratio = (Higher – Mean) : (Mean – Lower) • New avg = Old avg ± (Difference / New count)
Practice Target	Solve 25–30 problems from these 4 topics using CampusVazhi PYQ collection
Beginner Tip	Master the fraction–percentage table first (1/2 = 50%, 1/3 = 33.3%, etc.). This alone saves 2–3 minutes per paper.
Reviser Tip	Focus on alligation and remainder problems — these are the most frequently tested in TANCET.

CAMPUS VAZHI

DAY 3 — Quantitative Aptitude — Part 2

Algebra, Geometry, Time-Speed-Work, Profit & Loss

Topics	• Algebra: linear equations, quadratics, inequalities • Geometry: triangles (area, similarity, Pythagoras), circles (arc, sector), coordinate basics • Time, Speed & Distance: relative speed, trains, boats & streams • Time & Work: work efficiency, pipes & cisterns • Profit & Loss: cost price/selling price, marked price, discount chains
Key Formulas / Shortcuts	• Distance = Speed × Time (always convert units first) • Relative speed: same direction = S1 – S2, opposite = S1 + S2 • Work: If A does in x days, A's 1-day work = 1/x • Area of triangle = ½ × base × height | Heron's formula for sides • SP = CP × (1 + Profit%/100)
Practice Target	Solve 25–30 problems; spend extra time on geometry — it carries 4–5 questions in TANCET
Beginner Tip	For geometry, memorise the 5 standard triangle rules and 3 circle formulas. Don't go deeper than that for TANCET.
Reviser Tip	Practice trains and boats problems — they're quick marks if you know the relative speed shortcut.

DAY 4 — Verbal Ability & English

Reading Comprehension, Grammar, Vocabulary, Sentence Correction

Topics	• Reading Comprehension: main idea, tone, inference questions — practice 3–4 passages • Grammar essentials: subject-verb agreement, tense consistency, articles, prepositions • Sentence correction: common error patterns (misplaced modifiers, parallel structure) • Vocabulary: 50 high-frequency words from TANCET PYQs • Para jumbles: identify opening/closing sentences, linking words
Key Formulas / Shortcuts	• RC strategy: Read questions first → Skim passage → Locate answers • Sentence correction: check Subject–Verb–Object agreement first • Para jumble: find the independent sentence (no pronoun/connector) = first sentence
Practice Target	3 RC passages + 15 grammar/vocabulary questions from PYQs
Beginner Tip	Don't memorise a dictionary. Focus on the 50 words that repeat across TANCET papers — they keep recycling.
Reviser Tip	Time yourself on RC: 7–8 minutes per passage max. If you're slower, practice skimming techniques.

CAMPUS VAZHI

CAMPUS VAZHI

DAY 5 — Logical Reasoning — Part 1

Arrangements, Coding-Decoding, Blood Relations, Direction Sense

Topics	• Linear & circular arrangements: fixed position strategy, constraint ordering • Coding-Decoding: letter shift patterns, number coding, symbol substitution • Blood relations: family tree diagrams, coded relationship problems • Direction sense: compass-based movement, shortest distance
Key Formulas / Shortcuts	• Circular arrangement: fix one person, arrange rest = (n–1)! ways • Coding: always check +1, +2, –1, reverse, and alternate patterns first • Blood relations: draw the family tree — don't try to solve in your head
Practice Target	20–25 problems across these 4 types
Beginner Tip	Always draw diagrams for arrangements and blood relations. It feels slow but prevents silly mistakes.
Reviser Tip	These are high-accuracy topics. Aim for 100% accuracy here — they're easier than quant.

DAY 6 — Logical Reasoning — Part 2 + Data Sufficiency (MBA) / Computer Awareness (MCA)

Syllogisms, Series, Data Sufficiency, CS Fundamentals

Topics	• Syllogisms: Venn diagram method, all/some/no logic rules • Number & letter series: difference patterns, alternating series, geometric progressions • MBA — Data Sufficiency: 'Each alone' vs 'Both together' approach, trap answer patterns • MCA — Computer Awareness: OS basics, data structures (stack, queue, tree), networking fundamentals (OSI layers), DBMS (normalisation, SQL basics), C programming output questions
Key Formulas / Shortcuts	• Syllogism: 'All A are B' + 'All B are C' = 'All A are C' • Data Sufficiency: test Statement 1 alone → Statement 2 alone → Both together • MCA: Stack = LIFO, Queue = FIFO; Normal forms: 1NF → 2NF → 3NF → BCNF
Practice Target	MBA: 15 reasoning + 15 data sufficiency | MCA: 15 reasoning + 15 computer awareness
Beginner Tip	For data sufficiency, always test each statement independently first. Most students jump to 'both together' too quickly.
Reviser Tip	MCA students: focus on C output questions and SQL queries — these are the most commonly tested CS topics in TANCET.

CAMPUS VAZHI

DAY 7 — Full Mock Test #1

Simulate real exam conditions — 100 questions in 100 minutes

Topics	• Attempt a full-length TANCET PYQ under strict 100-minute time limit • Use a printed/offline copy — no phone, no breaks • After completion: score yourself honestly, mark questions by category • Analyse: which section took the most time? Where did you lose marks to negative marking?
Key Formulas / Shortcuts	• Ideal time split: Quant 35 min | Verbal 20 min | Reasoning 25 min | DS/CS 20 min • Skip rule: if a question takes > 90 seconds, mark and move on • Negative marking strategy: attempt only if you can eliminate 2+ options
Practice Target	1 full paper (100 questions) + 1 hour of detailed error analysis
Beginner Tip	Don't worry about your score today. Focus on completing all 100 questions within time — even if you guess some.
Reviser Tip	Track your accuracy % per section. Your target: 80%+ in your strong areas, 60%+ in weak areas.

DAY 8 — Weak Area Intensive

Targeted revision of your lowest-scoring topics

Topics	• Review your Day 7 mock test analysis — pick your 3 weakest topics • Re-study concepts + formulas for those topics (go back to Day 2–6 notes) • Solve 15–20 problems per weak topic — easy to medium difficulty only • Create a 1-page formula sheet / cheat card for each weak topic
Key Formulas / Shortcuts	• Write formulas by hand — handwriting improves recall by 30% vs typing • Use the 'explain to a friend' test: if you can't explain it simply, you don't know it well enough
Practice Target	45–60 targeted problems across your 3 weakest topics
Beginner Tip	Don't try to master everything. Get comfortable with easy–medium questions in weak areas — that's enough to pass.
Reviser Tip	This is where you gain the most marks. Converting 3 wrong answers to right = +4 marks (including saved negatives).

CAMPUS VAZHI

DAY 9 — Full Mock Test #2 + Formula Revision

Second simulation + rapid-fire formula review

Topics	• Attempt another full TANCET PYQ (different year from Day 7) under 100 minutes • Compare score with Day 7 — track improvement per section • Evening: rapid revision of all formula sheets created on Day 8 • Review the most common TANCET question patterns across years
Key Formulas / Shortcuts	• Top TANCET patterns: Percentage → Ratio → Geometry → Arrangement → RC • Last-day formula review is 3x more effective than re-solving problems
Practice Target	1 full paper + 30 minutes formula sheet revision
Beginner Tip	Your score should improve by at least 8–10 marks vs Day 7. If not, focus tonight only on your formula sheets.
Reviser Tip	Aim for 75+ marks in this mock. Fine-tune your time allocation if any section is consistently slow.

DAY 10 — Exam Day Prep

Light revision, logistics & mental readiness

Topics	• Morning: light revision only — read through your formula sheets (30–45 min max) • Do NOT attempt any new problems or full papers today • Prepare exam kit: hall ticket, ID proof, pen, pencil, watch (no smart watch) • Visit the exam centre location if possible — plan travel time + 30 min buffer • Evening: relax, sleep early (7+ hours), eat light dinner
Key Formulas / Shortcuts	• Exam strategy: attempt strong sections first, skip and return to tough ones • Last 10 minutes: review marked questions only, don't change answers unless certain • Stay hydrated, carry water, eat a banana or energy bar 30 min before exam
Practice Target	No new practice today — only formula sheet glance + exam logistics prep
Beginner Tip	Trust your 9 days of preparation. Exam-day panic is normal — take 3 deep breaths before you start.
Reviser Tip	You're ready. Spend 10 minutes visualising yourself calmly answering questions. Confidence matters as much as knowledge.

CAMPUS VAZHI

Last-Minute Formula Sheet

Tear this page out and carry it to the exam centre. Revise while waiting outside.

Quantitative Aptitude

- HCF × LCM = Product of two numbers
- Successive %: a% + b% = (a + b – ab/100)%
- Alligation ratio = (Higher – Mean) : (Mean – Lower)
- Simple Interest = P × R × T / 100
- Compound Interest: A = P(1 + R/100)^T
- Distance = Speed × Time
- Relative speed (same dir) = S1 – S2; (opposite) = S1 + S2
- Work: 1/A + 1/B = 1/Total days together
- Profit% = (SP – CP) / CP × 100
- Area of triangle = ½ × b × h; Circle = πr^2
- Quadratic formula: $x = (-b \pm \sqrt{(b^2-4ac)}) / 2a$

Logical Reasoning

- Circular arrangement: fix 1, arrange rest = (n–1)!
- Syllogism: All A→B + All B→C = All A→C
- 'Some A are B' does NOT mean 'Some B are A' is false — it's always true
- Blood relations: always draw the family tree, gender = circle/square
- Direction: N→E = right turn, N→W = left turn

Data Sufficiency (MBA)

- Test each statement alone FIRST, then together
- If one statement alone is sufficient, the answer is never 'both together'
- Watch for trap: statement seems insufficient but actually gives unique value

Computer Awareness (MCA)

- Stack = LIFO, Queue = FIFO, Deque = both ends
- Binary search: O(log n), Linear search: O(n)
- OSI layers: Physical → Data Link → Network → Transport → Session → Presentation → Application
- Normalisation: 1NF (atomic) → 2NF (no partial dep) → 3NF (no transitive dep) → BCNF
- SQL: SELECT ... FROM ... WHERE ... GROUP BY ... HAVING ... ORDER BY

Verbal Ability

- RC: read questions first → skim passage → locate answers
- Para jumble: find independent sentence (no pronoun) = opening
- Sentence correction: check S–V agreement → tense → modifiers → parallelism

CAMPUS VAZHI

Before You Go — Exam Day Checklist

- ☐ Hall ticket (printed copy)
- ☐ Government photo ID (Aadhaar / PAN / Driving Licence / Passport)
- ☐ 2 black/blue ballpoint pens + 1 pencil
- ☐ Analog watch (no smart watches allowed)
- ☐ Water bottle + light snack (banana / energy bar)
- ☐ Reach exam centre 30 minutes before gate opening time
- ☐ Read all 100 questions in first 2 minutes — identify easy ones
- ☐ Attempt strong sections first, skip and return to tough questions
- ☐ Last 10 minutes: review marked questions, don't second-guess unless certain
- ☐ Stay calm — you've prepared well. Trust your 10-day plan.

All the best from the CampusVazhi team!
